were cheap, but also because, using a multilens camera, several images could be secured with one operation. After processing, the plate was cut into single pictures with tin snips.

4. CARTE-DE-VISITE PHOTOGRAPH
The third application of the collodion process, patented in France in 1854 by Adolphe Eugène Disdéri.

The name refers to its similarity to a common visiting card size, for it was a paper print 2 1/4" to 2 3/8" X 3 3/4 to 4 " on a mount measuring 2 1/4 " X 4".

5. CABINET PHOTOGRAPH, a print 5 1/2" to 6" by 4" on a mount 6 1/2" X 4 1/4".

Introduced first in England in 1866; first appeared in Carbondale in 1880-1882.
